General information:

Situated on the south-west slopes of the Thuringian Forest within a hollow above the Werra valley and looking at the backgrounds of the tree-covered Ascheberg and Burgberg, you will find the eldest spa town in Thuringia: Bad Liebenstein.

The beauty of landscape at any time of year, the pleasant climate and most of all the curative springs made Bad Liebenstein become a recognised spa in the course of the past 4 centuries. Already before Germany's reunification our clinic enjoyed best reputation.

Our Heinrich Mann Klinik is situated right in the middle of a 7 hectare park. We have 290 handicapped accessible single rooms, en suite, with telephone, alarm call radio and emergency call unit. Pets are welcome – part of our success results from our idea to include your pet in your therapy.

Upon agreement it is possible, of course, to take in children or adult companions. You will stay in a comfortable double room or single rooms with connecting door.

If required, it is possible to benefit from treatment ambulant or as partly in-patient, in case you would prefer accommodation in a hotel. The neighbouring hotel Fröbelhof is convincing with its charm and its family like atmosphere.

The closest airport is Frankfurt/Main, some 150 km away. It would be a pleasure for us to support you in organising your transfer to our clinic.

Heinrich Mann Klinik

Neurology, orthopaedics, oncology and cardiologic rehabilitation

Indications:

Neurology

- Acute and chronic disease with injury to the central and peripheral nervous system
- Apoplexia/ cerebrovascular diseases
- Craniocerebral injury
- Inflammatory / chronic-inflammatory / demyelinating disease (e.g. M. Parkinson, multiple sclerosis, Chorea Huntington)
